

Supply of Prednisolone by Community Pharmacists to Patients with an Exacerbation of COPD

Protocol Number 301 Version 7

Date protocol prepared: March 2018

Date protocol due for review: March 2020

Expiry date: March 2021

This patient group direction must be signed by all health care professionals involved in its use. NHS Forth Valley should hold the original signed copy. The PGD must be easily accessible in the clinical setting.

Organisation	NHS Forth Valley

Job Title	Name	Signature	Date
Director of Nursing	Angela Wallace		4/5/18
Medical Director	Andrew Murray	Allun	4/5/18
Director of Pharmacy	Scott Mitchell	6 3	7/5/18

This document authorises the supply of **prednisolone** by appropriate practitioners to patients who meet the criteria for inclusion under the terms of the document.

Practitioners seeking to supply **prednisolone** must ensure that they assess all clients to make sure they meet the criteria before supplying the product.

The purpose of this Patient Group Direction is to help patients by ensuring that they have ready access to a quality assured service which provides a timely, consistent and appropriate supply of **prednisolone** for **an exacerbation of COPD**.

YOU MUST BE AUTHORISED BY NAME, UNDER THE CURRENT VERSION OF THIS PGD BEFORE YOU ATTEMPT TO WORK ACCORDING TO IT

CLINICAL CONDITION

Indication	To allow Community Pharmacists to supply prednisolone to patients with an infective exacerbation of Chronic Obstructive Pulmonary Disease (COPD)
Inclusion Criteria	Definite diagnosis of COPD Exacerbation characterised by two or more of the following • development or increase in sputum purulence • increase in shortness of breath • increase in sputum volume Patient has Forth Valley COPD "self-management plan" agreed with GP which allows for treatment from Community Pharmacist
Exclusion Criteria	 Active peptic ulceration Pregnancy Breastfeeding Untreated known tuberculosis Previous steroid psychosis More than 2 supplies by community pharmacist in any 3 month period. Exposure to chickenpox in patients with no definite history of chickenpox or shingles Patients on ciclosporin or methotrexate Patient does not have Forth Valley COPD "selfmanagement plan" at time of presentation
Caution/ Need for further advice	 In patients with diabetes – advise patient to monitor blood sugar closely (e.g daily in patients with Type II DM and four times daily in patients with Type I DM) Hypertension – patients should be advised to have their blood pressure checked if having repeated courses Congestive heart failure – worsening fluid retention – if worsening of breathlessness, advise patient to seek advice from GP or NHS 24. Osteoporosis – patients on repeated course of oral steroids or maintenance steroids may be at risk of osteoporosis. These patients should be advised to make a routine appointment with their GP to discuss this. Long term steroids or repeated courses in past year (more than

	4 courses in 12 months)— advise patient to speak to their GP / Practice Nurse before current course ends for further advice on tapering dose. Ensure patient has Steroid Warning Card supplied. 6. Prednisolone may exacerbate epilepsy . Patients with epilepsy should be asked if their epilepsy control has been upset by steroids in the past. If so, they should be referred to GP or contact the Out of Hours Service via Professional to Professional Line and no
	supply made 7. Patients on drugs which induce hepatic microsaomal enzymes - cytochrome P-450 (CYP) isoenzyme 3A4 such as phenobarbital, phenytoin, rifampicin, rifabutin, carbamazepine, primidone and aminoglutethimide may reduce the therapeutic efficacy of corticosteroids by increasing the rate of metabolism. Advise patients to see their GP or to contact NHS 24 if they do not feel they are improving or they are getting worse.
	 8. Patients taking Non-steroidal anti-inflammatory drugs Advise patients experiencing symptoms of GI upset to see their GP. 9. Patients on warfarin - Advise patient to contact GP Practice as soon as practical to arrange to have INR checked
Action if Patient declines or is excluded	1 – 9. Refer patient to GP or Out of Hours via Professional to Professional Line
