

**NHS Pharmacy First Scotland  
Approved List of Products**

18th Edition: 16th September 2022  
Review Date: 1st October 2023

**Changes made in this Edition:**

- Update to Section 1.4 to add Dioralyte oral powder sachets in pack size 20 and Dioralyte Relief sachets due to current supply issues with Dioralyte oral powder sachets pack size 6. This change is backdated to 1<sup>st</sup> September 2022 and claims will be accepted from that date.

## NHS Pharmacy First Scotland: Approved list of products

### Introduction

The Scottish Government NHS Circular [PCA \(P\)\(2020\)13](#), published in June 2020, details the launch of NHS Pharmacy First Scotland. The circular encloses the legal Directions, service specification and operational support documents which together outline how the service should operate.

This approved list of products has been developed by representatives of all 14 NHS Health Boards with input from Community Pharmacy Scotland and other key stakeholders. It details the limited list of items which may be supplied to eligible patients following a consultation in response to presenting symptoms. **Wherever possible, providing lifestyle advice and support to manage minor conditions should be the preferred course of action**, with treatment supplied and referrals made only where necessary. With the exception of sections 10.1 (Skin: Eczema and allergy) and 6.1 (Cystitis), the items detailed in the Approved List can be supplied across all NHS Boards. In sections 10.1 and 6.1, each NHS Board has indicated the approved items which may be supplied by community pharmacy teams in their area.

The medicines listed should be used within their GSL or P licensed indication, and the POM products listed should only be used under the terms of the relevant Patient Group Directions (PGDs). The approved list serves only to detail the treatments available under the service – the Pharmacist must use their own professional judgement at all times to determine the best course of action for each patient. Only those specific items and pack sizes which appear on this list will be reimbursed if supplied under the NHS Pharmacy First Scotland service. Where a patient wishes to use a particular product which does not appear on the Approved List and the Pharmacist agrees that this is safe and appropriate, the patient may purchase that product.

The Approved List is arranged according to BNF category, with products within each category listed alphabetically. Selection of products should be based on the Pharmacist's assessment of clinical appropriateness for each individual patient. However, where there is a clear first-line choice of treatment this is indicated.

A new section of the [Scottish Drug Tariff](#), Part 17, hosts the approved list of products.

### Notes

The list details the products available on the NHS Pharmacy First Scotland Service.

Please note the following points:

- A range of pack sizes and forms have been included for some lines to ensure continued supply when some are temporarily unavailable.
- When making a choice between available products, in the absence of a clinical reason determining otherwise, the most cost-effective one should be selected.
- When making a choice between a sugar free and a sugar containing product, in the absence of a clinical reason determining otherwise, the sugar free one should be selected.

When submitting reimbursement claims for products supplied, it is important that the label and claim should match the product as it is written in the Approved List. For example, if listed generically in the Approved List then the label and claim must be for the generic item. If listed as a branded product then the label and claim should be for that branded product.
